

An AI rep with a real workflow.

Built from campaigns, guardrails,
voice calls, bookings, and CRM memory.

Campaigns become playbooks.

Leads are ranked before they dial.

lead engine / Michigan queue

Record	Score	Value	Status
Missed call: Miller HVAC	9/10		Queued
Old estimate: A1 Roofing	8/10		Called
Past customer: Westside Plumbing	8/10		Voicemail
Property manager list	7/10		New
Booking confirmation	7/10		Booked

score

timezone

Guardrails run before every call.

The caller does not dial until the record passes safety checks.

Calls write back to CRM memory.

 agent run / activity log

08:31 ● Budget check passed

success

08:32 ● Qualified 41 active CRM records

info

08:33 ● Miller HVAC queued for call

success

08:34 ● Skipped consumer record: consent missing

warning

08:36 ● Call outcome saved to CRM

success

What we're building at YALID.

A service-sales workflow where the AI rep finds the next best lead, calls with guardrails, and remembers every outcome.

- Campaign playbooks
- Lead scoring
- Guarded voice calls
- Booking handoff
- CRM memory
